

Works Program To Ease Jobless Problem Planned By Ottawa

Ottawa—The government will throw a \$100,000,000 boner at the unemployment problem during the current fiscal year, it was announced today when supplementary estimates were tabled in the House of Commons.

New work-creating projects will cost \$40,000,000, which is in addition to the \$20,000,000 of the federal works program in the main estimates. These funds will be initiated in all parts of the Dominion.

In addition there will be \$17,500,000 for relief grants-in-aid to the provinces and \$10,000,000 for the federal minister, promised legislation to provide for more activity in low cost and low rental housing, and loans to municipalities on self-helping projects.

Mr. Charles Dunning, minister of finance, tabled supplementary estimates for a total of \$100,000,000. It will be in addition to the \$200,000,000 contained in the main estimates tabled earlier in the year.

At the same time Mr. Rogers, attorney general in charge of the department of the government's plans to deal with relief and unemployment, tabled the supplementary estimates of certain items in the estimates dealing with the work and other matters related to unemployment.

Public works alone will take \$15,750,000 in supplementary estimates. The parliament will be asked to vote. There also are large votes for road and bridge work, public works, and other projects. Total work projects and farm rehabilitation, farm employment and other projects, will take more than \$50,000,000.

Those engaged in the fisheries industry will not be forgotten and \$10,000,000 will be expended on the fishermen and groups of fishermen to provide supplementary estimates of \$100,000 additional devoted to expansion of fish markets in domestic and foreign markets.

Grants-in-aid are reduced by \$2,000,000 from last year, when the vote was \$19,000,000.

A large portion of the supplementary estimates goes to meeting the needs of the Canadian National Railways which will take \$20,000,000 in supplementary estimates, including their bonds. Trans-Canada Air Lines, Prince Edward Island Railway will be asked to vote more than \$10,000,000 in the supplementary estimates.

More than \$7,000,000 is to be spent on the construction of new housing and other development.

Loans and investments account for \$272,000, of which \$500,000 is to the Canadian Broadcasting Corporation and \$172,000 to the national harbor trust.

Mr. Rogers said the policy of the government is to stimulate the economy and to "broaden the long-range program of conservation and development" which was started in 1935, and the appropriation other than those for public works and other work on highways and highways.

The minister mentioned particularly \$100,000,000 for the program to mine drilling districts, \$200,000 for geological surveys, \$100,000 for forest highways and national parks and an additional \$100,000 to the \$100,000 voted for stimulation of level crossings.

Another work-producing item will take \$800,000 to be voted for the Trans-Canada Air Lines for construction and improvement of airports, and \$100,000 for the construction of \$500,000 to be spent in assisting municipalities to develop and improve their water supply and sewage disposal.

Those in addition to \$222,000 contained in the main estimates are \$100,000 for the construction of new housing and other development.

Mr. Rogers said that would be the last of the supplementary estimates for the current fiscal year. He said that the government's program is to create jobs and to provide for the unemployed.

"Legislation will be introduced to provide for interest-free loans to municipalities for self-helping projects."

"These important developments of the government's program are designed to provide for the unemployed and to provide for the unemployed."
